

# Cosmetic Palettes

Flambeau's palette boxes offer the best protection for your cosmetics. Made of a high clarity styrenic material, our palettes can withstand hot make-up being poured inside. The material will not crack or break from the high temperatures.

These palettes fit comfortably in your hand with rounded edges and corners increasing its impact resistance. The easy snap shut/open lid & base structure secures contents inside adding a dust proof and water resistance feature.

We offer a number of stock items ready to be taken off the shelf. We can also customize the interior compartments to your liking!

Customize the color of the palette by choosing any PMS color. Place your logo on the front to enhance your brand value and increase your total product offering.

# Cosmetic Palettes Sizes
