

VR Gear Cases

All virtual reality gear comes in cardboard boxes that easily damages and is not safe for travel. We recommend using our T1400 Gear Box or Small Tactical Case to safely store & protect your VR gear. These cases are crush resistant with durable ribbed wall support and a bead line seal between lid and base for water resistance. Featuring sturdy snap-shut latches, multiple locking points, easy carry handle, mechanical hinges, and it stands on two feet, these cases offer the perfect protection!

For easy protection, simply take the form fitting tray that already comes inside the Samsung Gear VR box and slide it into the T1400. The tray helps keep the headset in place when traveling.

For more rugged protection, the Small Tactical Case comes with pick n'pluck foam for customizing your VR & accessories to fit snug while traveling and helps provide shock resistance with foam in the lid and base.

T1400 Gear Box

Place the manufacturer's tray right inside for instant protection!

Small Tactical

Pick n'Pluck Foam to Customize All of Your VR Gear Accessories!

This case comes with an extra foam layer in the base. To properly store the headset discard that foam layer.

Features:

- Hard Rugged Case
